About Me

Passionate front-end developer with expertise in HTML, CSS, and JavaScript. Dedicated to crafting seamless user experiences through responsive design and innovative coding. proven collaborate in cross-functional teams, translating design concepts into functional websites. Eager to contribute technical skills to dynamic projects and drive digital excellence.

Experience

A.G.IINFOTech (As Intern)

React JS,UI/UX Developer • Bhaispati, Lalitpur

2022 October – 2023 January

Worked as a front-end developer with a passion for transforming ideas into visually stunning and user-friendly websites . With a solid foundation in HTML, CSS and Javascript. I speciallize in translating desgine concepts into responsive, interactive,and performant web application.

- **Learning React.js:** Familiarizing oneself with React.js involves understanding its core concepts such as components, JSX syntax, state management, props, and lifecycle methods. This often involves studying official documentation, tutorials, and online courses.
- **Working with State Management:** React.js provides various options for managing component state, including hooks like `useState` and `useEffect`, as well as libraries like Redux or MobX. Experience in choosing the appropriate state management solution based on project requirements and implementing it effectively is valuable
- **Understanding Routing:** Implementing client-side routing using libraries like React Router enables navigation between different views or pages in a React application. Experience in setting up routes, nested routes, and route guards enhances proficiency in building SPA (Single Page Application) interfaces.
- **Collaboration and Version Control:** Working in a team environment using version control systems like Git and collaborating effectively with other developers is a crucial aspect of React.js development experience.
- **Responsive Design:** Designing interfaces that adapt to different screen sizes and devices to ensure a consistent user experience across platforms.
- **Wireframing:** Creating low-fidelity wireframes to outline the structure and layout of the user interface before diving into visual design.

Sprout Technology

Data specialist

2023 October - Present

Working as a data specilist within a tight deadline requires effective time management and efficient workflow organization.

Education

SLC

Future Star High School , Jawalakhel,Lalitpur / 2016

+2
